Feedback	The Seismic CB team has presented a comprehensive marketing plan and activities that will help generate the necessary hype and reach for the presale.

PROJECT ASSESSMENT

GemPad has conducted a thorough and meticulous evaluation of the project “Seismic CB”. Our process involved an initial data review of information available on their website and socials, followed by live interviews with the project team and later fact-checking all the information gathered. The evaluation covered 12 crucial categories to ensure quality, authenticity, and compliance.

After this thorough review, we're delighted to confirm that Seismic CB met or exceeded GemPad's strict criteria. The project showcased an unwavering commitment to transparency and responsiveness throughout the vetting process. The team didn't hesitate to provide all necessary information promptly and exhibited flexibility in adapting to necessary changes for a successful outcome.

The Seismic CB team's vision to develop a dApp that caters to both new and well-seasoned crypto users a way to use crypto as a means for payment in their “traditional fiat transactions”, this vision aligns with GemPad's commitment to crypto's mass adoption. GemPad is dedicated to educating non-crypto users about the benefits and use cases of cryptocurrency in traditional scenarios.

Based on all the information we've gathered, we proudly award Seismic CB the **VETTED Badge**, a testament to the project's dedication to maintaining high standards of quality, authenticity, and compliance.

This public document was finalized on the 17th of December 2023, we would like to congratulate the Seismic CB team on their successful completion of the vetting process. We eagerly look forward to continuing our engagement with the project and monitor closely its progress.
